Package 'aidR'

August 2, 2018

Title Load,

Version 0.0.0.9000

Description The aidR package does this and that.

Depends R (>= 3.4.1),
    ggplot2,

License MIT

Encoding UTF-8

URL https://www.schliebs.github.io/aidR

BugReports https://www.github.com/schliebs/aidR

LazyData true

Imports tidyverse,
    hrbrthemes,
    lubridate,
    magrittr,
    openxlsx,
    readxl

RoxygenNote 6.0.1

Collate 'importFrom.R'
    'countrynames.R'
    'randomHelpers.R'
    'test_demonstration.R'
    'downloadAidData.R'
    'unzipAidData.R'
    'cleanAidData.R'

Suggests knitr,
    rmarkdown

VignetteBuilder knitr

SystemRequirements GNU make

R topics documented:

---

downloadRawAidData   *Download Raw Dataset*

Description

Description

Usage

```
downloadRawAidData(dataset = "China", folder = "", filename = NULL)
```

Arguments

dataset   The Dataset chosen for download. Options currently include "China","AidDataCore".

folder   A character string containing the name of a subfolder of the current working
                 directory where the dataset shall be saved in.

filename   A character string for the name of the file (without filetype ending).

Value

A character string of the file path and name of the downloaded raw data.

Warning

Do not operate heavy machinery within 8 hours of using this function.

Examples

```
## Not run:
downloadRawAidData(dataset = "China",
                   folder = "rawdata",
                   filename = "MyChinaData")

## End(Not run)
```

---

prepAidData   *Unzip and process Data*

Description

Description

Usage

```
prepAidData(filepath = "AidDataChina.zip", dataset = "China")
```

Arguments

filepath	A character string of either a folder or zipfile (including suffix) including the data.
dataset	The Dataset chosen for download. Options currently include "AidDataCore","China", "worldbank", .

Value

A data frame with the output data (further cleaning to be added.)

Warning

Do not operate heavy machinery within 8 hours of using this function.

Examples

```
## Not run:
df <-
downloadRawAidData(dataset = "China") %>%
prepAidData(filepath = .,
          dataset = "China")
head(df)

df <-
 prepAidData(filepath = "AidDataChina.zip",
             dataset = "China")
head(df)

## End(Not run)
```

---

subsahara	*Dirichlet-sample of a multinomial election poll*

Description

Description

Usage

```
subsahara()
```

Value

A character vector with subsaharan country names.

Warning

Do not operate heavy machinery within 8 hours of using this function.

Examples

```
subsahara()
```

testLuca	*Dirichlet-sample of a multinomial election poll*

Description

Description

Description

Usage

```
testLuca(par1, par2)

testLuca(par1, par2)
```

Arguments

par1	parameter1
par2	parameter2
par1	parameter1
par2	parameter2

Value

A data frame containing n rows of blabla.

A data frame containing n rows of blabla.

Warning

Do not operate heavy machinery within 8 hours of using this function.

Do not operate heavy machinery within 8 hours of using this function.

Examples

```
x <- c(1,2,3)
mean(x)
x <- c(1,2,3)
mean(x)
```

unifyCountrynames	*Unify countrynames*

Description

Description

Usage

```
unifyCountrynames(inVec)
```

Arguments

inVec   A vector or character string of country name(s)

Value

A character vector containing the unified strings.

Warning

Do not operate heavy machinery within 8 hours of using this function.

Examples

```
x = c("Congo Kinshasa",
      "Congo, Republic of",
      "Congo Brazzaville",
      "Cote d`Ivoire",
      "Central African Rep.",
      "Cabo Verde",
      "Gambia, The")

 unifyCountrynames(x)
```
